

# NIDAC

# PRO2410

**"The most reliable and flexible Proximity Reader on the market" ..**

PRO2410 proximity reader offers a uniquely flexible solution with all the regular features Presco™ access control systems provide.

With simple wiring configurations, the PRO2410 will output Presco™ or Weigand data and operates on 12V or 24V DC.

The PRO2410 slim line design can be used with Aiphone® AX-DV-P and AX-DVF-P door stations by removing the top cover and reads all EM proximity cards and tags.

Like all Nidac keypads and RFID readers the PRO2410 is backed by a 36 month warranty and will operate on low cost cable when used with Presco™ controllers, making it the best choice when installing access control systems.
